Keywords Dried-banana, Poster media

ABSTRACT

There is an increase in production of safety agri- produces. Although the knowledge on production of food safety and practice are concerned, the producers are not able to follow the standard produces. The goal of this study was to produce the poster media easily understood related to the safe-banana production, and presented the media to 148 dried-banana producers, then evaluated their learning outcomes before and after the presentation. Demographic information showed that 70.9% of the producers were female with the average age of 46 years old, 75% of them graduated from primary school, 63.5% had main occupation as agriculture, 68.9% had part time occupation as dried – banana producers and most of them had revenue of 30,000-39,999 Baht. More than 50% of the producers had 1-5 years-experiences in dried-banana production. The learning outcomes after the poster presentation showed significantly increase ($\alpha = 0.05$) using *t*-test and indicated that the producers satisfied with the poster media. Moreover, they gained more knowledge and understood how to produce the safety dried-banana.
