ACKNOWLEDGEMENT

I would like to begin by expressing my deep gratitude and appreciation for the guidance, encouragement and support from my major adviser, Assoc. Prof. Dr. Wattanapong Rakwichian, and advisers, Assist. Prof. Dr. Mathanee Sanguansermsri and Assist. Prof. Dr. Suchart Yammen, without whom, this dissertation would not have been possible.

I am also thankful to my Internal Examiner, Dr.-Ing. Nipon Ketjoy and External Examiners, Assoc. Prof. Dr. Uriwan Vijaranakul and Dr.-Ing. Boonyang Plangklang for their suggestions and useful comments.

My special appreciation goes to all the staff of the School of Renewable Energy Technology (SERT); for without their generosity and support, my study would not have proceeded as smoothly as it had. There are too many to acknowledge, but I would like to mention a few in particular, they are Ms. Sukruedee Nathakarakule, Ms. Prapita Thanarak, Mr. Chatchai Sirisumphanwong, Mr. Yodthong Mensin, Mr. Paitoon Laodee and Ms. Chutima Songsriyo.

In addition, my sincere thank goes to my classmate, Mr. Achitpon Sasitharanuwat, and his family for their kindness and hospitality during my stay in Thailand.

Last but not least, I am especially grateful to my family for their unyielding love, support and encouragement throughout the duration of my study.

Loh Heng Chew
