ACKNOWLEDGEMENT

I would like to express my appreciation to my advisor, Assistant Professor Dr. Metha Rutnakornpituk for his encouraging guidance, supervision and helpful suggestion throughout this research. Thank to Dr. Uthai Wichai and Dr. Chor. Wayakron Phetphaisit as coadvisors for their valuable guidance and advice throughout this research.

I am grateful for every valuable advice from all instructors in the Department of Chemistry, Naresuan University.

I would like to thank Assistant Professor Dr. Voravee P. Hoven and Miss. Piyaporn Akkahat from Chulalongkorn University for supporting necessary laboratory equipments.

I am also thankful for the research financial support from Faculty of Science, Naresuan University. Many thanks are also the extended to the Center of Excellence for Innovation in Chemistry (PERCH-CIC) for scholarship. I acknowledge the National Research Council of Thailand (NRCT) for financial support.

Gratitude is expressed towards everyone who has contributed suggestions and supports throughout this work. Finally, I wish to express thankfulness to my family and friends for their love, support and encouragement.

Nantharak Rodkate
