ACKNOWLEDGEMENT

The success of this thesis can be attributed to extensive support and assistance from my major adviser, Dr.-Ing. Nipon Ketjoy, my adviser, Associate Professor Wattanapong Rakwichian and Associate Professor Pumisak Intanon. I wish to deeply thank them for valuable advice and warm guidance, informative discussions and encouragement during this thesis.

I am extremely grateful to my internal examiner, Dr.Sukruedee Nathakaranakule and my external examiner, Assistant Professor Achitpon Sasitharanuwat and Dr.Somchai Chokmavroj for their suggestions and useful comments.

I am thankful to the Energy Policy and Planning Office (EPPO), Ministry of Energy, Thailand for the financial support of this study.

I would like to specially thank School of Renewable Energy Technology (SERT), Wire & Wireless Co. Ltd. and Dr. Eng. Tsutomu DEI for biomass gasified power generation system, all necessary equipments, suggestions and a helping hand.

I wish to thank Ms. Amy De Nobrega for her suggestions and contribution to the editing of this manuscript for international publication.

I would like to thank Dr.Prapita Thanarak and all staff of SERT for their cooperative and generous assistance.

I am thankful to the Office of Environment Area 3 Phitsanulok, Office of Land Transport, Phitsanulok and Office of Disease Prevention and Control 9th Phitsanulok, Thailand for measurement of air and noise quality of gasification system.

Finally, I would like to express my deepest appreciation to my husband, Lieutenant Colonel Kreangkrai Ladpala, my mother and my daughters for their support, love and encouragement they have given to me throughout this tiresome process. In addition, I would like to say thanks to all my relatives, my colleagues, especially Vice Director Boonchoo Nakto, at Bansuan Witthayakom School and all my friends for their warm support, kind advice, friendship and valuable experiences.

Sahataya Ladpala
