## ACKNOWLEDGEMENT

This thesis is an issue of contributions from many people, without their assistance I could never have finished my thesis. Sincerely, I would like to take this moment to express my deepest gratitude and appreciation to them.

First, I would like to express my sincere thanks and appreciation for Assistant Professor Dr. Usa Padgate, my thesis advisor, who gave me her hand to bring me from the darkness. She has kindly supported me beneficial advices, invaluable comments, guidance and encouragement. Furthermore, she has provided me many useful suggestions during the process, even the busy time, for the accomplishment of this thesis. Without her care for several months, this thesis would not have been complete.

Second, the deepest sincere thanks also go to my thesis committee members, Associate Professor Dr. Watana Padgate, Dr. Sasitorn Chantharothai, Associate Professor Dr. Kriengsukdi Syananondh, Dr. Sudsuang Yutdhana, and Assistant Professor Dr. Bandhit Chatwirote, this thesis would likely not have matured without their consideration and approval from start to finish. They contributed with excellent suggestions which reflected their expertise.

Third, genuine thanks to Dr. Narat Kanprachar, Dr. Payung Cedar, Dr. Saovapark Kallayanamit, Associate Professor Maliwan Phakpraphai, and Assistant Professor Pornipa Permthai. They have provided me with helpful guidance.

My sincere appreciations also go to the staff at Bangkok Alloy Enterprise Company Limited for their helpful assistance to spend their valuable time to give me information.

Wholehearted thankful gratitude is given to my family for their concern, understanding, support, patience and especially their pure love because I have this better life because of their love.

Finally, I would like to thank my lovely classmates and all other people who provided me with kind information and assistance but are not named in this acknowledgement.

Sasilak Rodphotong
