

LIST OF CONTENT

Chapter	Page
I INTRODUCTION	1
Rationale for the Study	1
Purpose of the study.....	3
Significance of the Study	4
Scope of the Study	4
II REVIEW OF RELATED LITERATURE AND RESEARCH.....	5
Chillies.....	5
Solar Energy	12
Biomass	13
Biomass in Thailand.....	16
Gasifier.....	21
III RESEARCH METHODOLOGY.....	32
Research Instruments.....	32
Solar Collector	33
Drying Chamber	33
Biomass Gasifier system	36
Reactor.....	36
Methodology	40
IV RESULTS AND DISCUSSION	51
Equilibrium Moisture Content and Sorption Isotherm of Chillies.....	51
Analysis of Experimental Results	57

LIST OF CONTENT (CONT.)

Chapter	Page
V CONCLUSION AND RECOMMENDATION.....	69
Conclusion.....	69
Recommendation.....	72
REFERENCES.....	73
APPENDICES.....	79
Appendix A : Proximate and Ultimate Analysis of Corn Cob.....	80
Appendix B : Equilibrium Model in the Reactor.....	82
Appendix C : Calculation of Air Flow Rate into a Reactor.....	88
Appendix D : Solving for Gas Heating Value, Available Heat from Gas, Gas Yield Per Unite Weight of Carbon Gasified and Calculation of the Air-Fuel Ratio.....	90
Appendix E : Gasifier Efficiency.....	94
Appendix F : Necessary Parameters for Solar Dryer Design.....	96
Appendix G : Chemical Properties of Dried Chilli.....	99
Appendix H : The Design of Biomass Gasifier.....	101
BIOGRAPHY.....	109

LIST OF TABLES

Table	Page
1 Pungency and Uses of Chillies	7
2 Chemical Properties of Dried Chillies	11
3 Potential Biomass Gasifier Feedstock.....	15
4 Relative Humidity Exhibited by Saturated Salt Solution at Different Temperature	41
5 Predicted Parameters and Comparison Criteria for EMC Models of Chillies	52
6 Color Parameters of Dried Chillies.....	67
7 Compositions of Corn Cob from Proximate and Ultimate Analysis. Tested And Reported by the Department of Science Service, Bangkok on 23 June 2004.....	81
8 Heat Capacities (constants A, B, C and D)	86
9 The Calculation for Air to Burn Producer Gas.....	93
10 Chemical Properties of Dried Chilli from the Experiment Tested and Reported by the Department of Science Service, Bangkok on 23 June 2006	100

LIST OF FIGURES

Figure	Page
1 Thai red chillies namely Prik Jinda	9
2 Traditional Drying of Chillies.....	11
3 Annual Production of Selected Agricultural Products in Thailand (1966-2001)	19
4 Annual Residues of Selected Agricultural Products in Thailand (1996-2001)	20
5 Annual Surplus of Selected Agricultural Residues in Thailand (1996-2001)	20
6 Annual Surplus Energy of Selected Agricultural Residues in Thailand (1996-2001)	20
7 Updraft Gasifier	22
8 Downdraft Gasifier	24
9 Dryer System Using Biomass and Solar Energy.....	32
10 Side View of Solar Dryer	34
11 Roof of the Dryer.....	34
12 Side View of Burning Chamber	35
13 Front View of a Flat Plate Solar Collector	35
14 Corn Cobs which Was Used as Fuel.....	37
15 Top of the Reactor	38
16 Biomass Gasifier System.....	38
17 Combustion and Reduction Zone	39
18 Ash Pit.....	39
19 Cyclone and Gas Storage Tank	39
20 Control Panel of an Automatic Ignition System	40
21 Process to Generate the Producer Gas	46
22 Measuring Position	47

LIST OF FIGURES (CONT.)

Figure	Page
23 Diagram of the Hunter Lab Color Space.....	48
24 Flow Chart of Chillies Preparation for Drying	50
25 EMC of Chillies at Various Temperatures by Haley Model	53
26 EMC of Chillies at Various Temperatures by Modified Henderson Mode	53
27 EMC of Chillies at Various Temperatures by Modified Haley Model	54
28 EMC of Chillies at Various Temperatures by Modified Oswin Model	54
29 EMC of Chillies at Various Temperatures by Modified BET Model.....	55
30 EMC of Chillies at Various Temperatures by Smith Equation Model	55
31 Plots of residual EMC by Modified Halsey model vs predicted EMC for Thai red chillies	56
32 Prediction Sorption Isotherm of Chillies Using Modified Halsey Model at drying temperature of 50, 60 and 70 °C.....	56
33 Relationship of Moisture Content and Specific Heat of Chillies	57
34 Temperatures of Inlet Air and Various Zones in the Reactor.....	58
35 Results from Using the Equilibrium Model to Predict the Composition of the Producer Gas	59
36 Effect of Moisture Content on the Quantity of Product Constituents	60
37 Model Comparison with Experimental Data.....	60
38 Evolution of Air Outlet Temperature from Collector Compare to the Solar Incident.....	62
39 Relationship of Moisture Content of Chillies and Drying Time Compare for 5 Batches	63
40 Chillies on the Trays in the Drying Chamber.....	64
41 Comparison of Moisture Content by Time at Various Drying Air Temperature .	65
42 Hunter Lab Testing for Chillies Color	66

LIST OF FIGURES (CONT.)

Figure	Page
43 Fresh and Dried Chillies=.....	66
44 The Design of Corn Cob Down Draft Gasifier.....	106
45 The Front View of a Cyclone (Unit in cm).....	107
46 The Dimension of a Cyclone (Unit in cm).....	108
