ACKNOWLEDGEMENTS

Firstly, I would like to express my greatest gratitude and appreciation to my advisor Assistant Professor Dr. Sutisa Thanoi for her continuous supervision, guidance, understanding, and support throughout my study. My appreciation to her devotion for me for the preparation of this thesis and defense examination.

I would like to express my gratefulness to my co-advisor Assistant Professor Dr. Samur Thanoi, who has provided me valuable suggestion, encouragement, pieces of advice with many aspects of academic writing and helpfulness throughout my study. My gratefulness to Dr. Onravee Khongsombat for her valuable guidance and instruction.

I would like to particularly thank Naresuan University Research Fund and Thailand Research Fund (TRF) for the financial supports. I also acknowledge Naresuan University, Payao Campus, for the scholarship under the staff development project. I would like to thank the Department of Anatomy, Faculty of Medical Science, Naresuan University, for facility support.

My wholehearted thanks to all of my teachers for their instructions, my friends and colleagues of the neuroscience laboratory unit, Department of Anatomy, Faculty of Medical Science, Naresuan University for their sincere helps and cheerful support. I would also like to spread my gratefulness to Ms.Rachanee Chanasong and Mr.Ekarin Chulikorn for their assistances, valuable advices and encouragements.

Furthermore, I would especially like to thank the Graduate School, Naresuan University for supporting my thesis book making.

Finally, I would not miss to thank my beloved family for their love, care, financial support, and encouragement throughout my life.

Walailuk Kerdsan
