

LIST OF CONTENTS

Chapter	Page
I INTRODUCTION	1
Rational of the Study.....	1
Objective	2
Statement of Hypothesis	2
Scope	2
Keywords	2
Benefits	2
II LITERATURE REVIEWS	3
Blood coagulation	3
Mechanism of blood coagulation.....	3
Component of the fibrinolytic system.....	6
The mechanism of fibrinolysis system.....	9
Diseases caused by defective fibrinolysis focus on thrombosis	11
Thrombolytic therapy.....	12
Chromogranin A	14
Structural biology.....	15
Biological function	18
Chromaffin cells and plasminogen activation system.....	22
III RESEARCH METHODOLOGY	25
Materials.....	25
Equipments.....	26
Molecular reagents and chemicals	26
Methods of Experiment.....	27

LIST OF CONTENTS (CONT.)

Chapter	Page
IV RESULTS AND DISCUSSION.....	37
Cloning and Analysis of nucleotide sequence of the	
Human chromogranin A	37
Expression of recombinant proteins in <i>Escherichia coli</i>	44
Purification of recombinant human chromogranin A	
protein by affinity column chromatography	51
Plasminogen activation assays and kinetic study.....	60
IV CONCLUSION.....	66
Conclusion	66
REFERENCES	68
APPENDIX	76
BIOGRAPHY	83

LIST OF TABLES

Tables	Page
1 Some properties of the main components of the fibrinolytic system	9
2 Property of thrombolytic drugs	13
3 Physicochemical properties of CgA	17
4 Proposed functions of chromogranin A (CgA)	20
5 Proposed Actions of Granin-Derived Peptides.....	21
6 Oligonucleotide primers used for DNA amplification of human chromogranin A.....	28
7 PCR conditions for truncate CgA.....	29
8 Primer and colony PCR condition for determine recombinant CgA clones	32
9 Summary of kinetic parameters containing Km, Kcat, Kcat/Km and %Efficiency of full-length and truncated recombinant hCgA in plasmin activity assays	62

LIST OF FIGURES

Figures	Page
1 The coagulation cascade model.....	5
2 Functional domains of tPA.....	8
3 Activation and Inhibition of the Fibrinolytic Pathway.....	11
4 Localization of Chromogranins with Dense-Core Secretory Granules.....	15
5 Schematic illustration of Chromogranin A-derived peptides.....	16
6 Schematic representation of human chromogranin A gene, protein, and some of its biologically active peptides.....	18
7 Biological function of CgA	19
8 Proposed working model for a local (autocrine/paracrine) chromaffin cell plasminogen/plasmin system and its interactions with CgA	23
9 Series of recombinant hCgA clones generated by PCR with truncated C-terminus	28
10 The 1% agarose gel electrophoresis of the full-length and truncated human chromogranin A gene	37
11 The 1% agarose gel electrophoresis of colony PCR of the TA-full- length and the truncated human chromogranin A recombinant clones.....	38
12 The 1% agarose gel electrophoresis of the full-length and the truncated human chromogranin A recombinant clones.....	39
13 Alignment between the full-length Homo sapiens chromogranin A gene in TA plasmid without signal peptide and stop codon for in vitro expression	41
14 Alignment between the amino acid sequence of full-length human chromogranin A in pET21b(+) and wide type human chromogranin A without signal peptide and stop codon for in vitro expression	43

LIST OF FIGURES (CONT.)

Figures	Page
15 The 1% agarose gel electrophoresis of colony PCR of the pET21b(+)-full-length and the truncated human chromogranin A recombinant clones.....	44
16 Effect of induction time on the truncated recombinant hCgA1-214 proteins expression.....	46
17 The heat-stable hCgA1-419 of proteins were analyzed by 10% SDS-PAGE (A) and characterized by western blotting (B).....	47
18 Expression of human chromogranin A proteins lysates from E. coli BL21(DE3) pLysS cells containing pET21b(+)-hCgA recombinant plasmids. The heat-stable full-length and the truncated human chromogranin A recombinant protein were analyzed by 10% SDS-PAGE	48
19 Western blot analysis of full-length and truncated recombinant humanCgA proteins were characterized by mouse anti-Histidine (6X) antibody	50
20 Western blot analysis of truncated recombinant human CgA proteins were characterized by mouse Anti-chromogranin A monoclonal antibody	50
21 SDS-PAGE analysis of purified recombinant hCgA proteins of the hCgA1-448 by affinity column chromatography	52
22 SDS-PAGE analysis of purified recombinant hCgA proteins of the hCgA1-419 by affinity column chromatography	53
23 SDS-PAGE analysis of purified recombinant hCgA proteins of the hCgA1-377 by affinity column chromatography	54
24 SDS-PAGE analysis of purified recombinant hCgA proteins of the hCgA1-345 by affinity column chromatography	55

LIST OF FIGURES (CONT.)

Figures	Page
25 SDS-PAGE analysis of purified recombinant hCgA proteins of the hCgA1-315 by affinity column chromatography	56
26 SDS-PAGE analysis of purified recombinant hCgA proteins of the CgA1-278 by affinity column chromatography	56
27 SDS-PAGE analysis of purified recombinant hCgA proteins of the hCgA1-249 by affinity column chromatography	57
28 SDS-PAGE analysis of purified recombinant hCgA proteins of the hCgA1-214 , hCgA1-195, hCgA1-164, hCgA1-126 by affinity column chromatography	58
29 SDS-PAGE analysis of purified recombinant hCgA proteins by Electroelution	59
30 Effect of full-length and truncated recombinant hCgA on plasmin activity assays	61
31 Proposed effect of protein folding of hCgA on plasminogen activation.....	64
32 Proposed effects of paired dibasic residues of hCgA on plasminogen activation	65
33 pET-21(+) cloning/expression region	77
34 pET-21(+) sequence landmarks	77

ABBREVIATIONS

AMC	=	7 amino-4 methyl-coumarin
bp	=	Base pair
°C	=	Degree celcius
