## ACKNOWLEDGEMENT

This thesis would not have been possible without the support of many people. I would like to begin by thanking my advisor, Assistant Professor Dr. Nathorn Chaiyakunapruk, for his valuable support and guidance.

Many thank to my co-adviser, Dr. Usa Chaikledkaew, for the useful instructions and comments.

I would like to sincerely thank to Dr.Boonsong OongPhiphatanakul for his kind support and suggestion.

I am very grateful to Buddhachinaraj hospital that allowed me to use the hospital data and I would also like to thank experts in many departments of Buddhachinaraj hospital including the computer department, the chemical laboratory department, and the center of artificial limb.department, for their advice and support.

Special thanks to Miss Napawan Jeanpeerapong who helped me to contact with other experts and gave me many useful suggestions. I also thank Dr. Witsanuchai Srijariya for giving me the valuable information for my thesis.

Also thanks to my thesis committee, Professor Dr. Supasit Pannarunothai, and Professor Dr. Peter C. Coyte for their useful comments.

I would like to thank the CORE research team especially Mr. Joshua A. Ray for answering many of my questions and allowed me to use their valuable instrument.

Finally I want to thank Thailand Research Fund for the financial support

Suphachai Chirakup
